National Treatment Court Resource Center (NTCRC)

Our mission is to provide treatment court professionals with the information needed to design and implement programs that align with best practice standards, expand and enhance court operations, as well as collect and analyze program data.

NTCRC resources are featured on the website (www.ntcrc.org) and include original publications, interactive maps, operational materials organized by court type, seminal readings for treatment court stakeholders, calendar of professional development opportunities, and more.

Learning Objectives

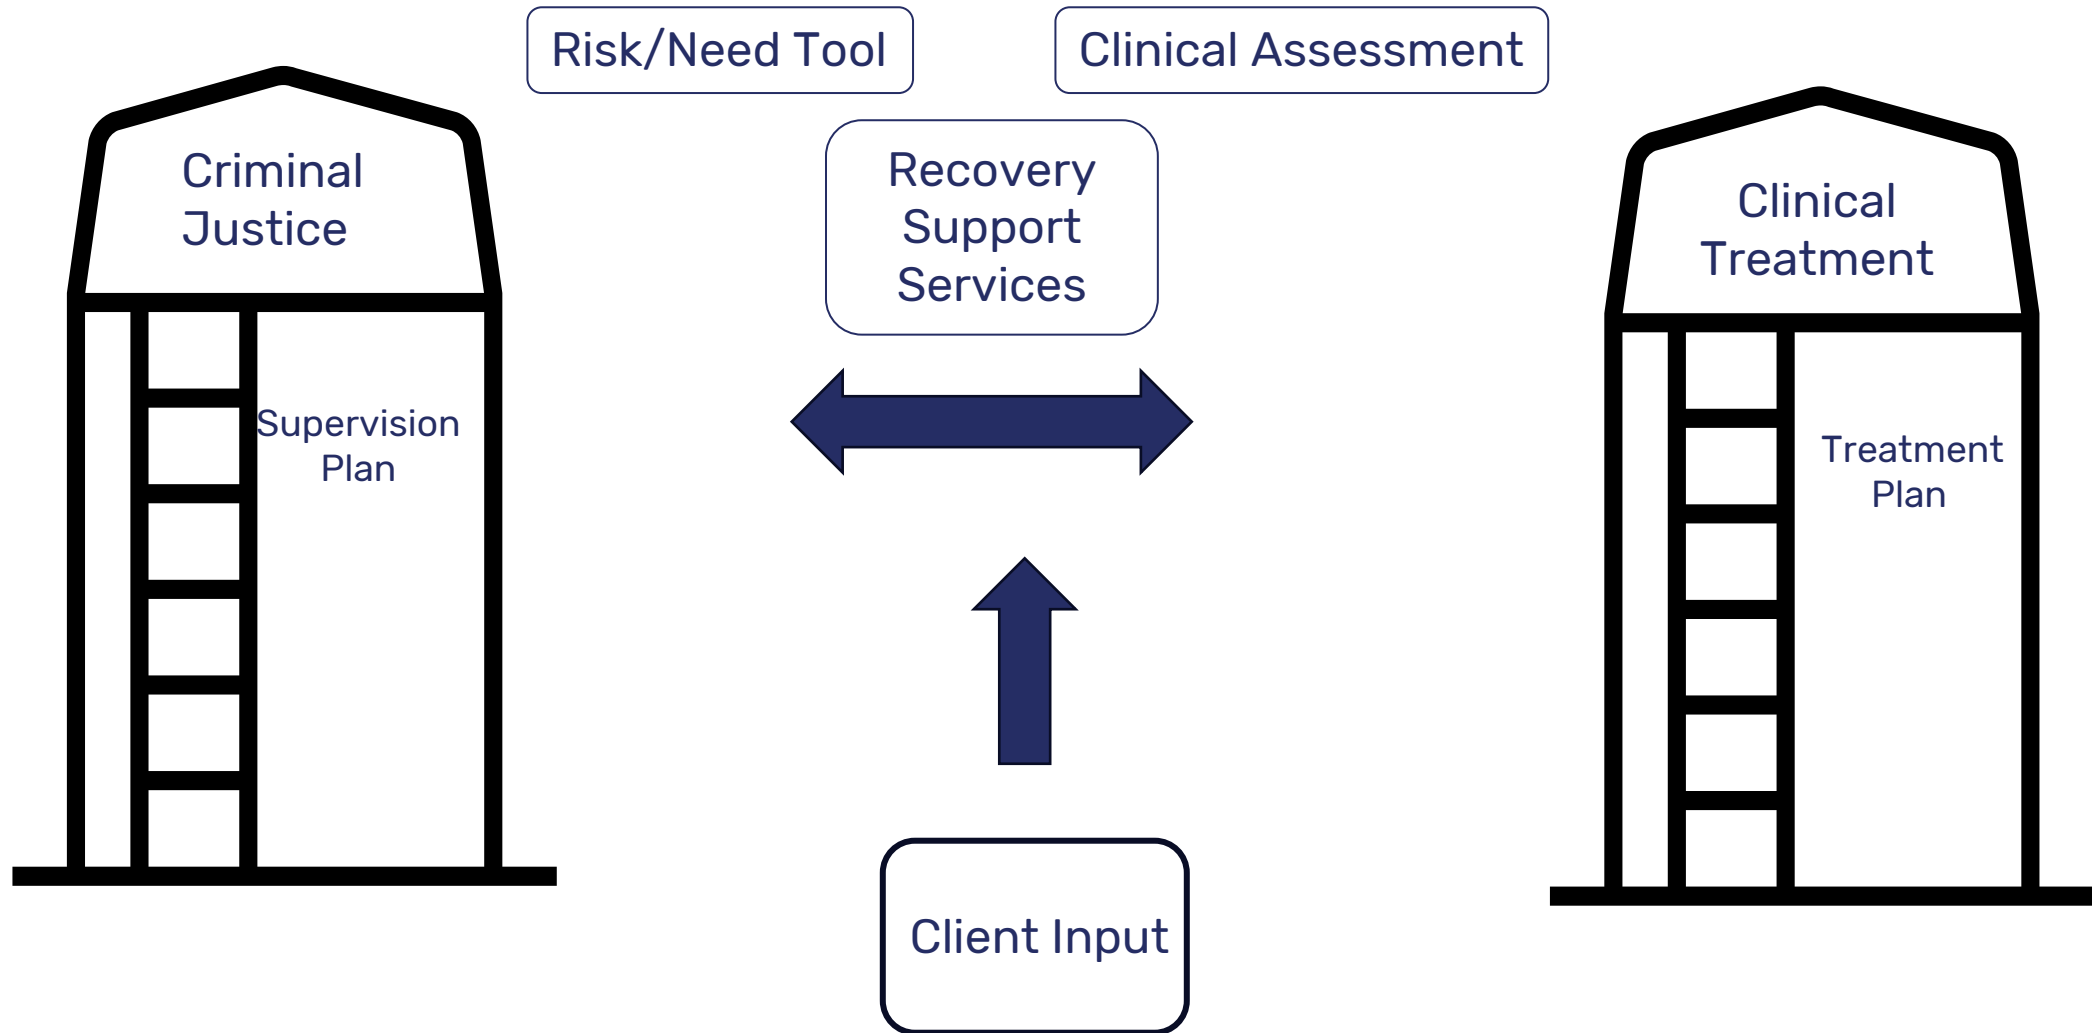

1. Increase knowledge regarding the role of case management within the treatment court model & participant success.
2. Increase knowledge regarding how concepts of risk, need, & responsiveness inform collaborative case planning.
3. Increase knowledge regarding specific strategies & tools for engaging participants in case management sessions.

Risk-Need-Responsivity Model

Risk-Need-Responsivity Model

Risk → “who” should be treated?

- Assess level of risk (to re-offend)
- Match risk level to appropriate level of treatment & supervision

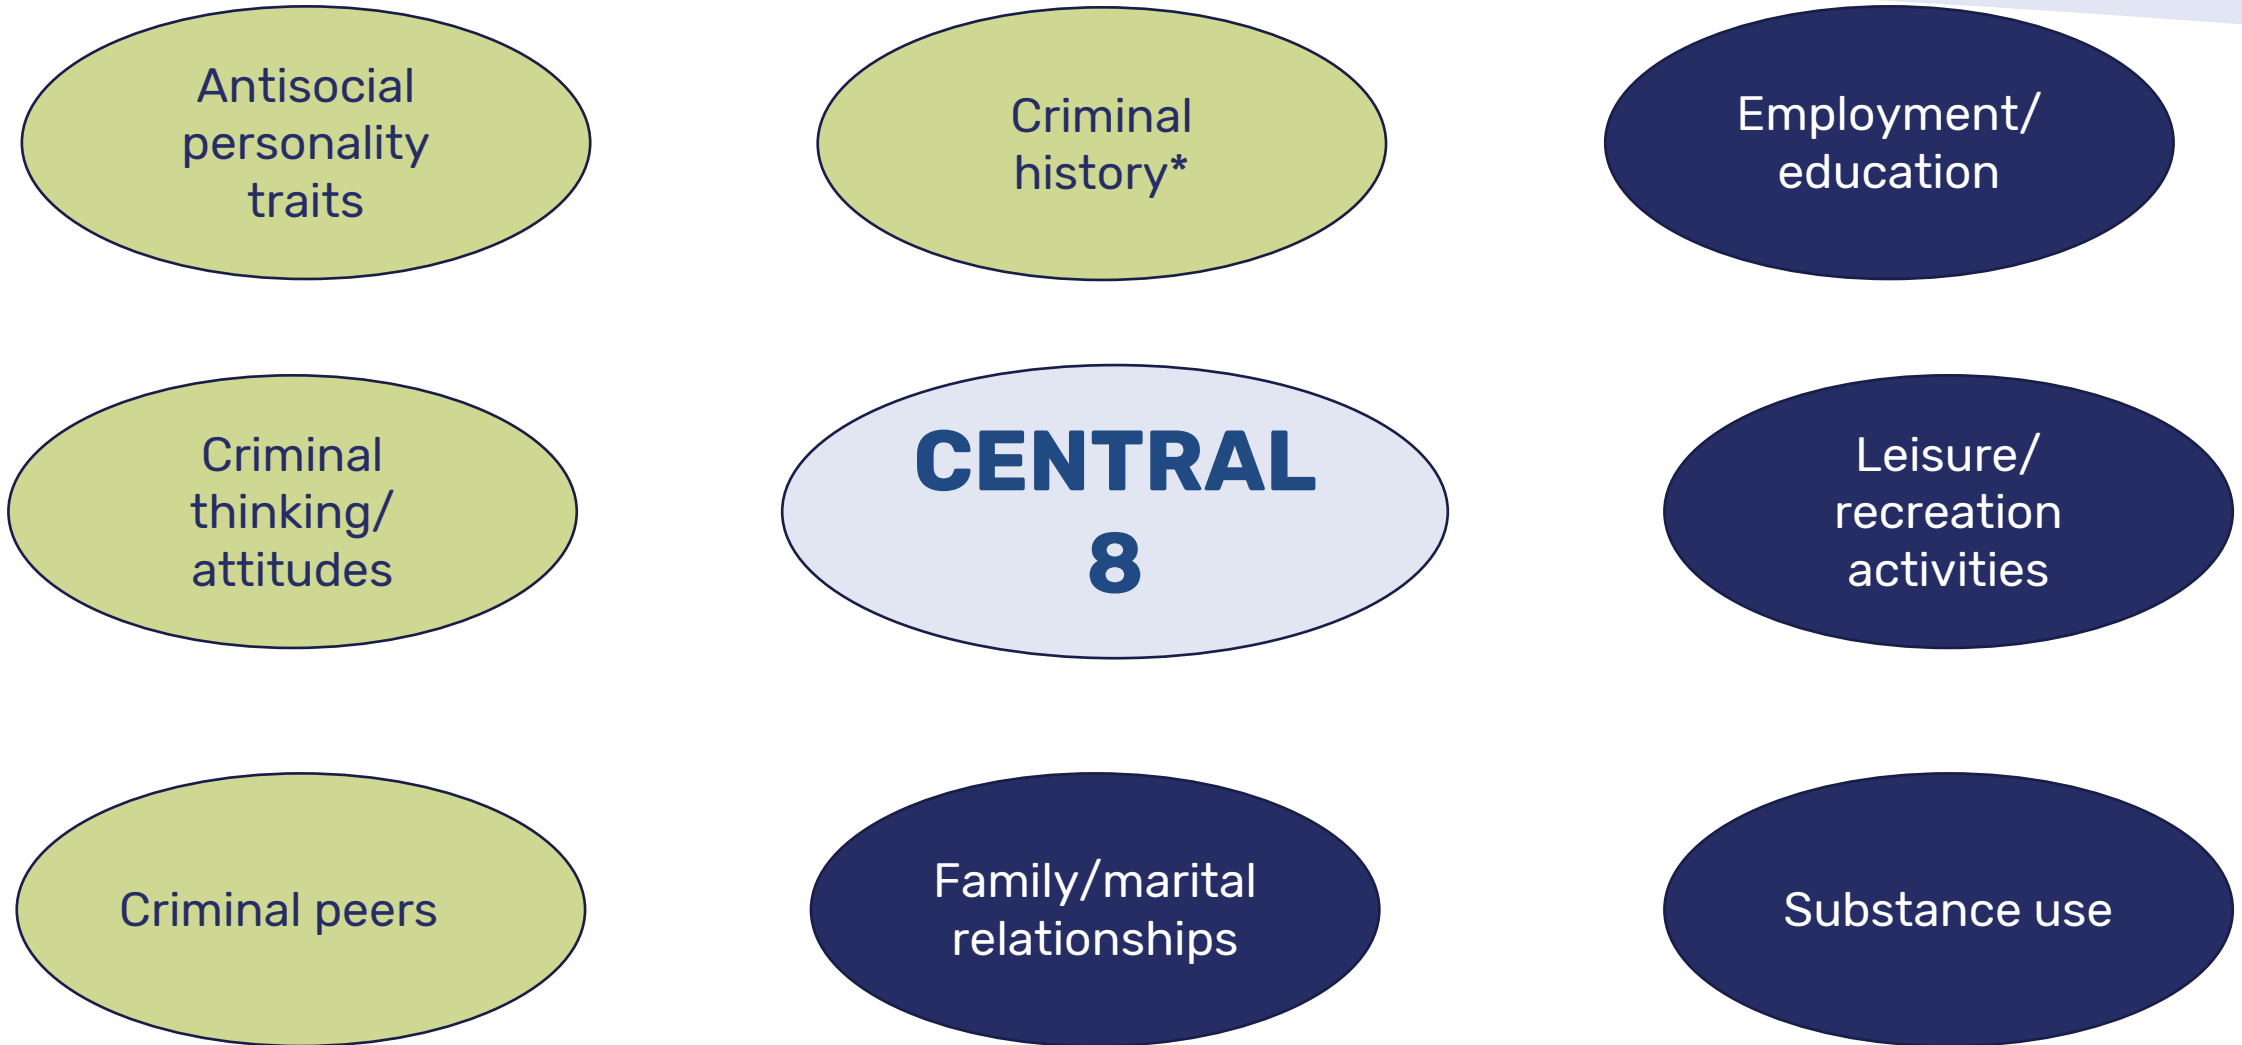

Need → “what” should be treated?

- Factors that are driving the criminogenic risk level
- Addressing these factors will reduce the likelihood of recidivism

Responsivity → “how” to treat the identified needs?

- Cognitive behavioral interventions/programming
 - Need to consider:
 - - Learning style, motivation, abilities, & strengths
 - - Gender, race, culture, etc.
- Importance of relationships
 - Empathic, empowering, firm, & fair → must balance

Criminogenic Risk Factors (dynamic)

* is static in nature

Protective Factors*

Problem-solving skills

Strong family support

Empathy

Self-control

Stable housing

Motivation for treatment

Involvement in work/
leisure activities

Life goals

Prosocial network

Youth RNR Assessment Tools*

- Youth Level of Services/Case Management Inventory (YLS/CMI)
- Youth Assessment and Screening Instrument (YASI)
- Structure Assessment of Violence Risk in Youth (SAVRY)

Adult RNR Assessment Tools*

- Ohio Risk Assessment System (ORAS)
- Level of Service Inventory (LSI)
- Level of Service/Case Management Inventory (LS-CMI)
- Level of Service Inventory–Revised (LSI-R)
- Women’s Risk Need Assessment (WRNA)
- Correctional Offender Management Profile for Alternative Sanctions (COMPAS)
- Computerized Assessment and Referral System (CARS)
- Impaired Driving Assessment (IDA)

ORAS-CST Risk Levels by Gender

Males	Rating
0-14	low
15-23	moderate
24-33	high
34+	very high

Females	Rating
0-14	low
15-21	low/moderate
22-28	moderate
29+	high

ORAS-CST Domains & Level of Need

	Low	Moderate	High
criminal history	0-3	4-6	7-8
peer associations	0-1	2-4	5-8
criminal attitudes & behavioral patterns	0-3	4-8	9-13
education, employment, & financial situation	0-1	2-4	5-6
family & social support	0-1	2-3	4-5
neighborhood problems	0	1	2-3
substance use	0-2	3-4	5-6

ORAS-CST Domains & Level of Need

Need Domains	Level	Ways to Address Need
criminal history	high	
peer associations	moderate	“Thinking about friendships” activity (Carey Guides)
criminal attitudes & behavioral patterns	high	MRT Thinking for Change
education, employment, & financial situation	high	GED Job skills training Financial literacy classes
family & social support	low	
neighborhood problems	low	Housing assistance
substance use	high	SUD Tx

Tool 1

Thinking About Friendships

Most of us have many people in our lives we consider "friends." This Tool asks you to think about the traits you do and do not like in a friend and to identify the people you spend most of your time with.

Part A

- a.** What do you look for in a friend? Do you value trustworthiness, loyalty, generosity? **Think** of all the things you like best in a friend and list them in the chart below. Keep going until you list six traits.

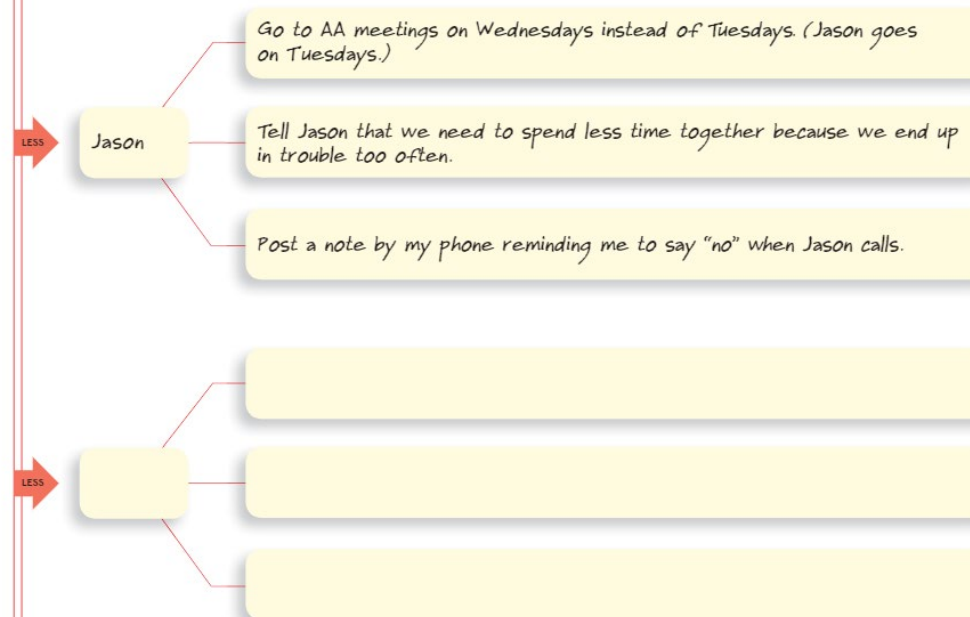

b. Number your list to show how important each trait is to you. Put a 1 beside the most important trait on your list, a 2 beside the second most important trait, and so on.

Things You Like in a Friend	Rating

- 4 Select** two people with whom you would like to spend less time. **Brainstorm** ideas about how you can spend less time together.

Example:

ORAS-CST Domains & Level of Need

Need Domains	Level	Ways to Address Need
criminal history	high	
peer associations	moderate	“Thinking about friendships” activity (Carey Guides)
criminal attitudes & behavioral patterns	high	MRT Thinking for Change
education, employment, & financial situation	high	GED Job skills training Financial literacy classes
family & social support	low	
neighborhood problems	low	Housing assistance
substance use	high	SUD Treatment

Role of Case Management in Participant Success

NADCP Best Practice Standards

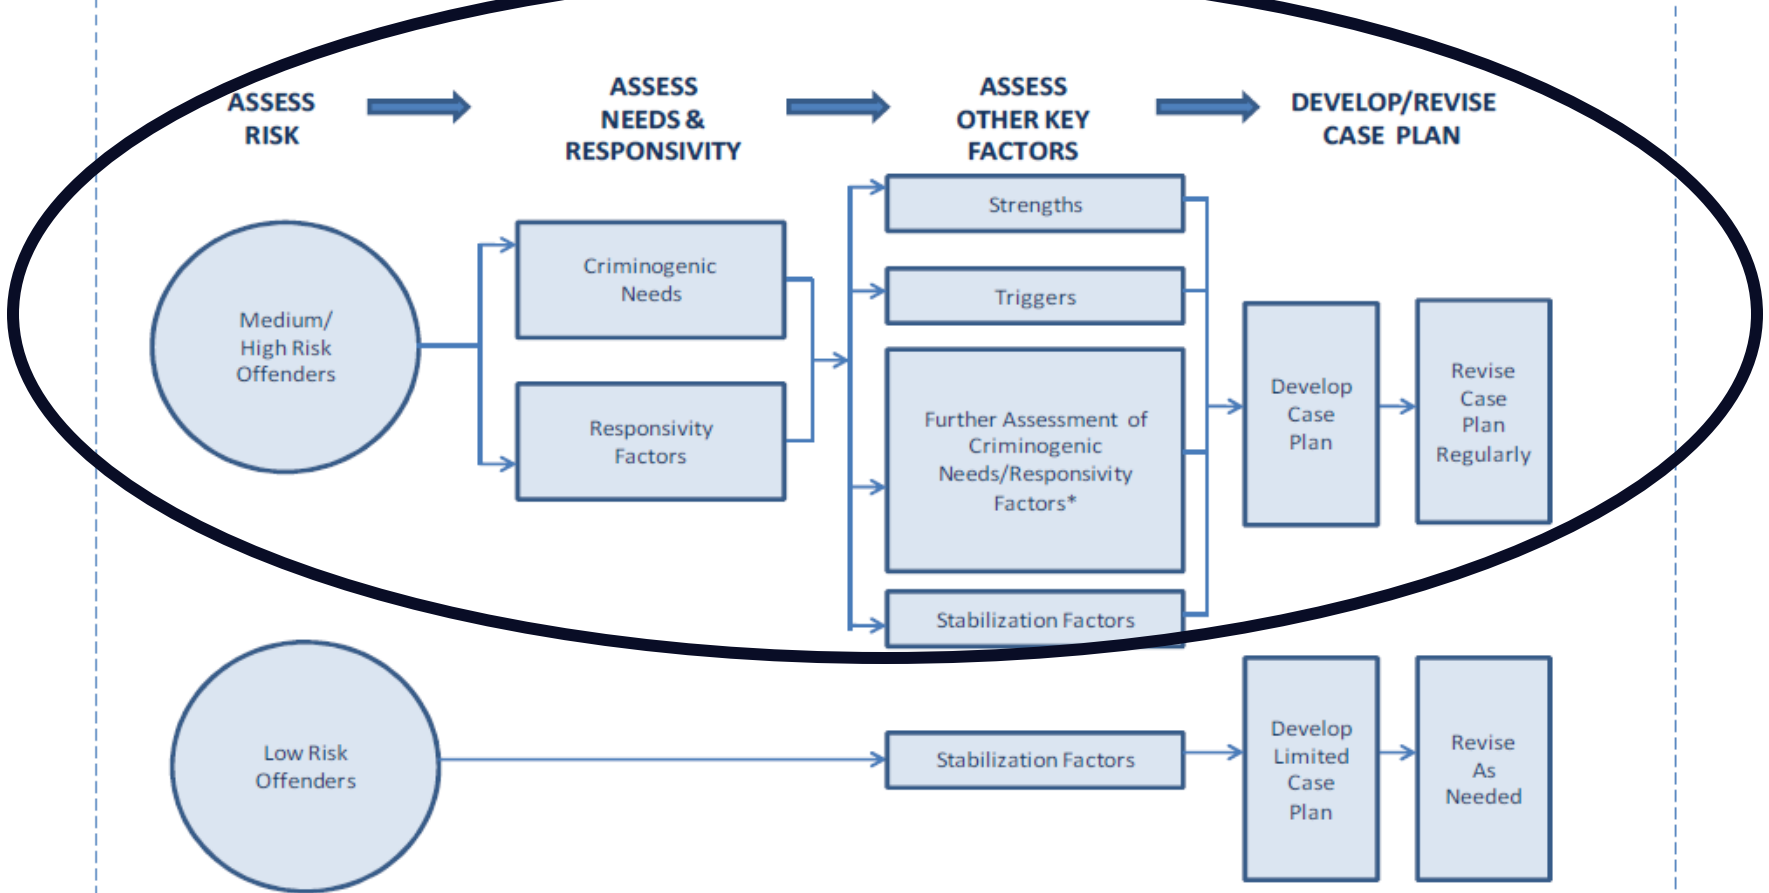

BPS #6: “Participants receive complementary treatment and social services for conditions that co-occur with substance use disorder and are likely to interfere with their compliance in Drug Court, increase criminal recidivism, or diminish treatment gains.”

BPS #6: “Court case managers or clinical case managers must leverage these financial resources and enroll participants for eligible benefits to meet participants’ needs for substance use disorder treatment and other complementary services.”

(p. 12)

Exhibit 1: Preparing for the Case Planning Process

**Some factors such as substance abuse and education (criminogenic needs) and mental health and functional level (responsivity factors) may require further assessments.*

See *Case Management: A Critical Element of the TPC Model* at www.prisontransition.com for a more detailed consideration of case management as it relates to offenders' level of risk.

Functions of Case Management

Screening & Assessment

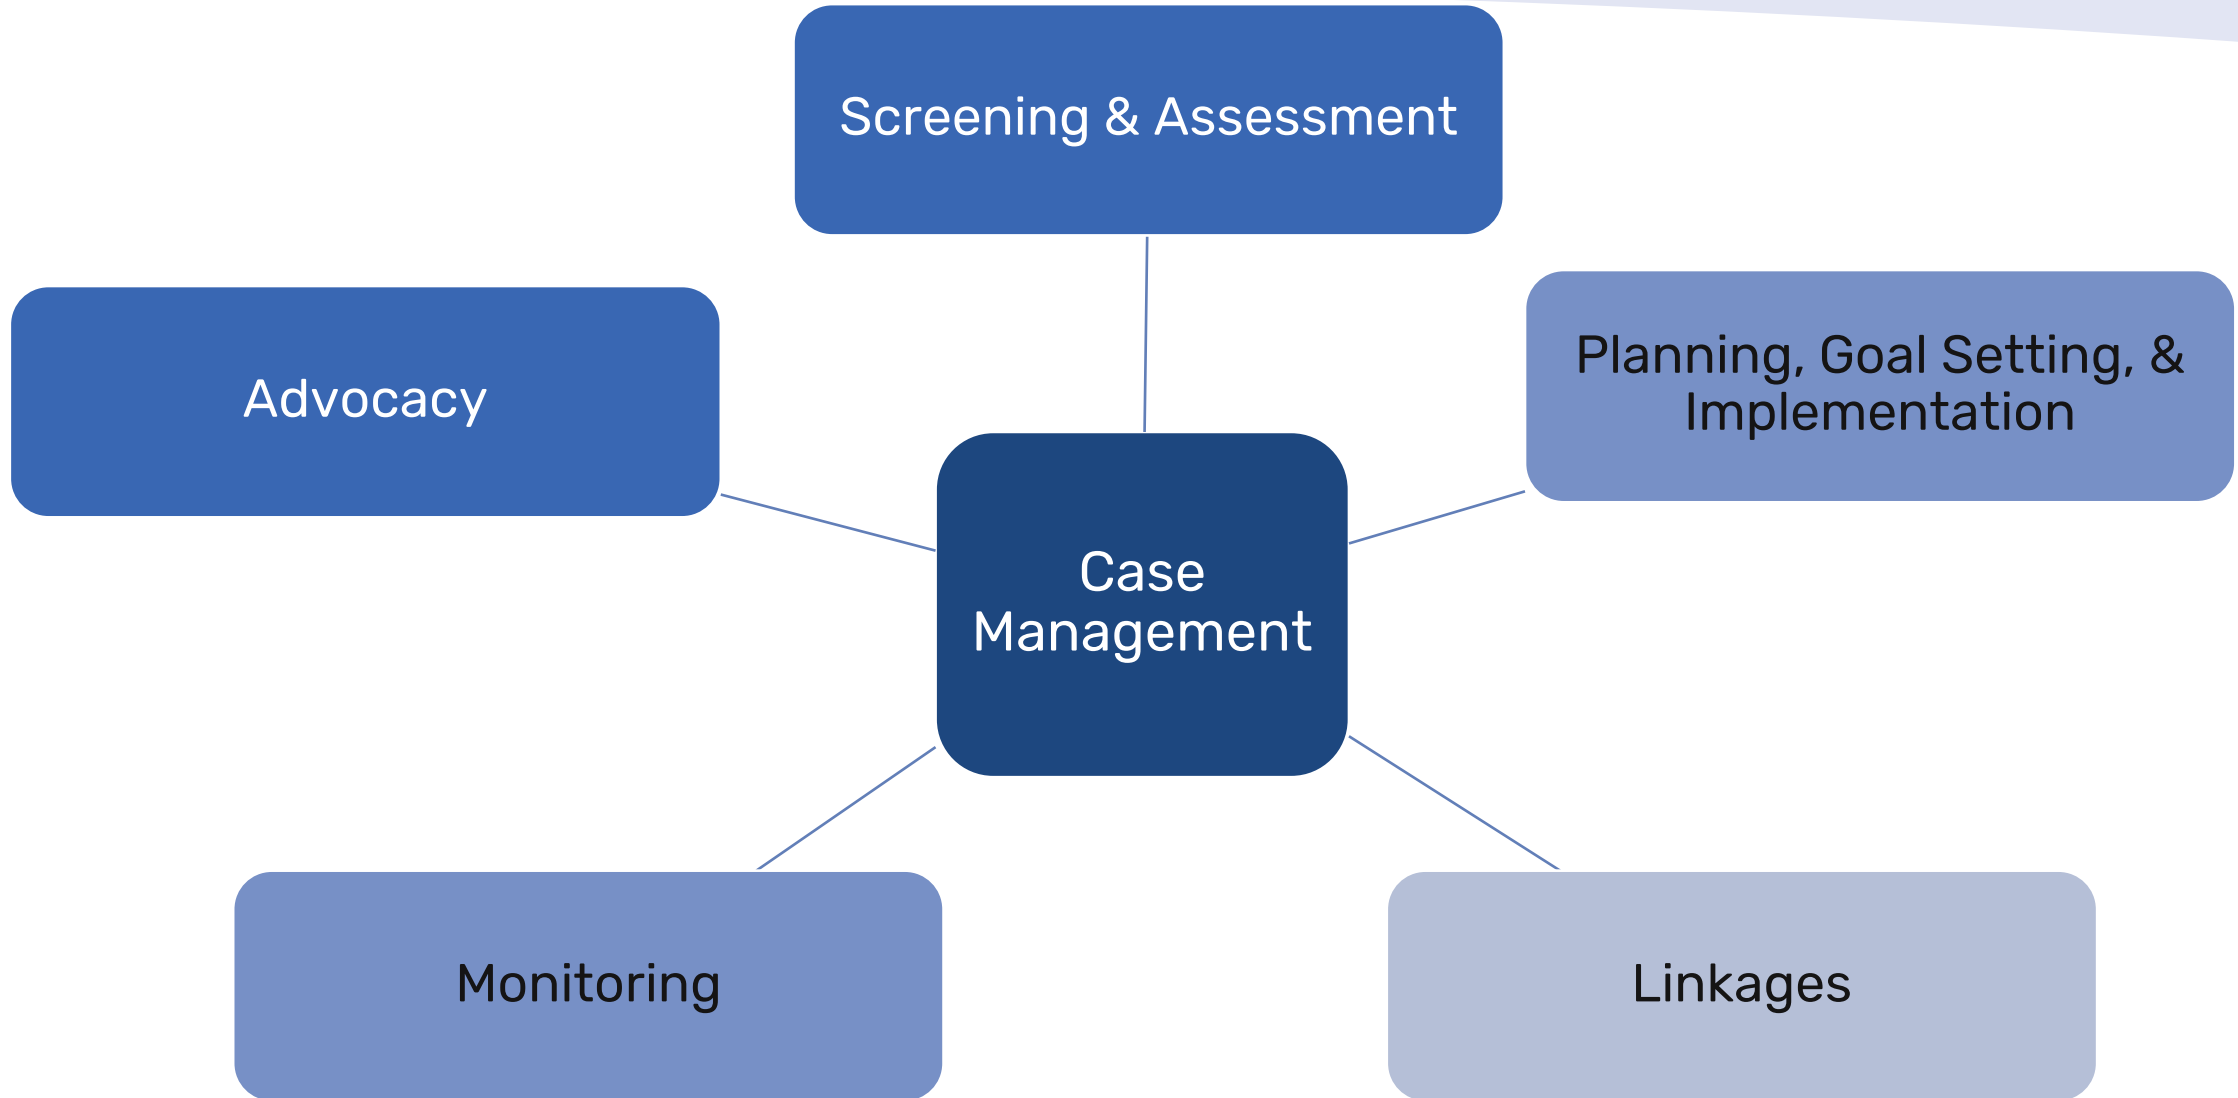

Advocacy

Planning, Goal Setting, & Implementation

Case Management

Monitoring

Linkages

Planning, Goal Setting, & Implementation

Utilize the results of the risk and needs tool to inform the WRITTEN collaborative case plan

Capitalize on the strengths

Identify triggers

Address stabilization factors

Match clinical treatment to individualized needs

Planning, Goal Setting, & Implementation

- Goal Setting
 - Develop goals WITH the participant
 - Should be positive, attainable, & reasonable
 - Written steps to achieve goal → discuss at case management sessions
 - Re-evaluate regularly to assess progress
 - Talk about client's goals and progress in staffing.
- Implementation of collaborative case plan as written is key!

Linkages

- Need to map the identified needs to the recovery support services
- Include both criminal justice and treatment in mapping process
- Must have extensive knowledge of the resources available
 - Community mapping

Linkages

Recovery Support Services	Agencies Providing Service(s)
Employment	
Childcare	
Housing	
Education	
Food insecurity	
Financial literacy	
Transportation	
Support groups	
Clothing	
Healthcare	
Cultural/Language	

Monitoring

On-going communication with team & service providers re: progress

Ensure participant is receiving adequate service

Changes in areas of risk & need → must reassess

Advocacy

Ensure participants are receiving needed services

- Access not hindered
- Equal access

Assisting with the pursuit of services, which may include locating a new provider

- Expansion/creation of services

Ties directly to collaborative case plan

- Must be targeted to the needs & enhance strengths

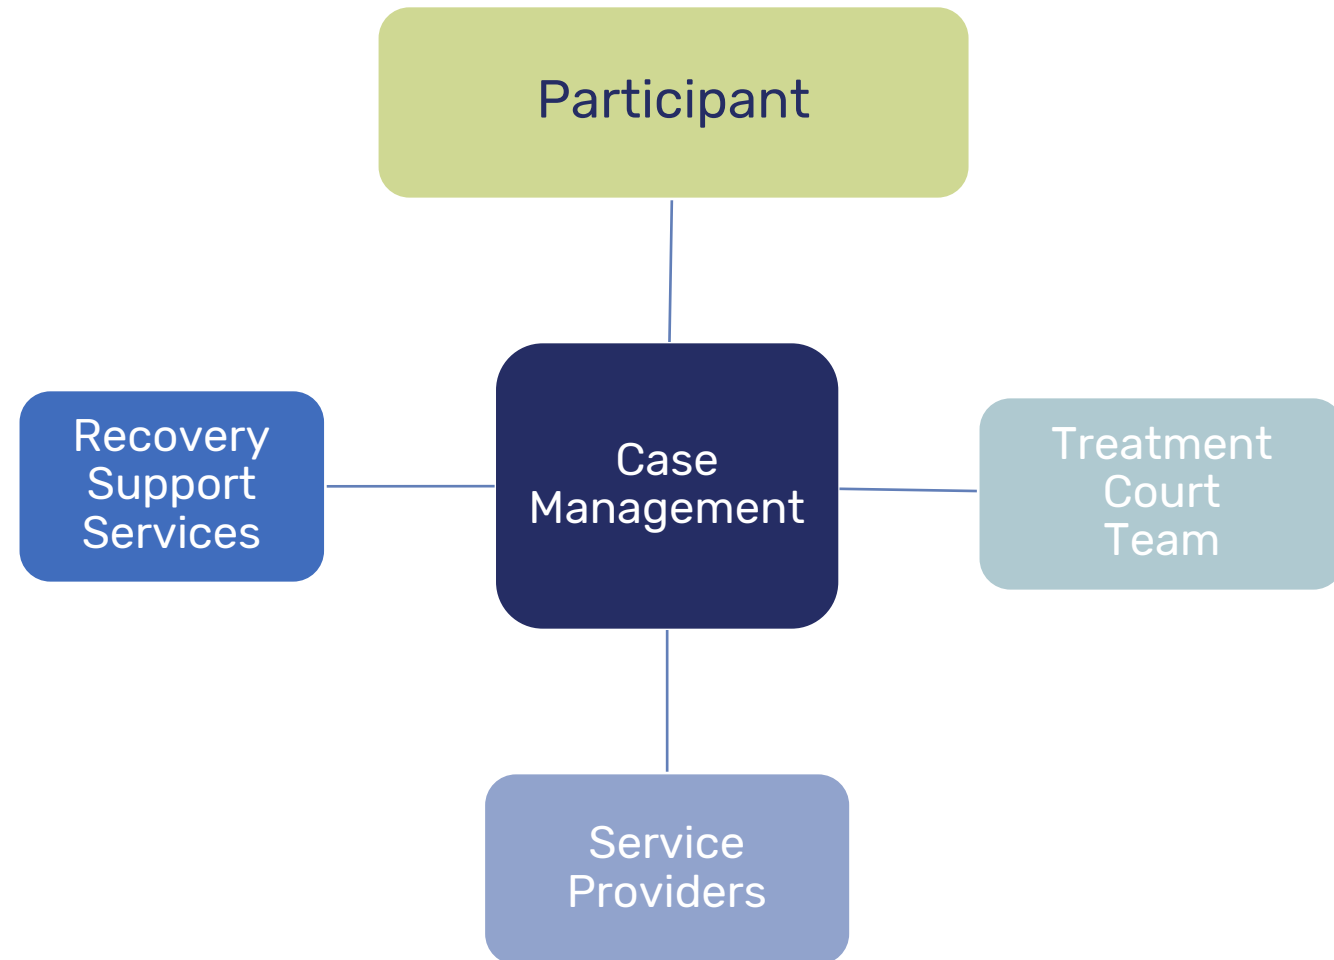

Other Key Characteristics of CM

- Knowledge of the justice system
- Evidence-based
- Strengths-based
- Relationship-based
- Team-based
- Meaningful
- Motivational
- Change-based
- Culturally proficient
- Family-focused
- Accountability-based
- Public safety-focused
- Ethically sound
- Counseling & crisis intervention

Summary: Collaborative Case Planning

- Integrates both criminal justice & treatment elements
 - Risk/need assessment results
 - Clinical assessment results
 - Participant input
- Is a dynamic document & process
 - Case management sessions/activities → should focus on criminogenic needs
 - Reassessment is key
