

Office of the Supreme Court Marshal

Judicial Safety Tips

Internet and Social Media Safety Tips

Social Media (Facebook, Instagram, Twitter, TikTok, etc.)

- Restrict your account permissions so that your personal details and posts are not public.
- Do not tag people in pictures or other posts without their permission.
- Do not post pictures and information alerting people that you are currently on vacation. Wait until you return to share pictures and highlights over social media.

Online Property Tax Websites

- If your county makes property tax information available online, such as AccessDane, you may be able to remove your name from displaying with your property address.

General Computer and Internet Tips

- Make sure your online passwords are complex and changed regularly.
 - Pro tip: A space can be used as one of the characters in most passwords.
 - Pro tip: Use the first letter of each word in a favorite saying or song lyric. Swap out a few letters for symbols (\$ instead of S or # instead of H) to increase the strength of the password.
- Use a password manager to create and store strong passwords.
- Use two-factor authentication whenever available. This requires verification by text message, email, or phone call before allowing access to a website.
- Update your computer operating system and internet browser regularly to ensure you have the most recent security updates and patches installed.
- Consider creating a separate email address that you only use for online shopping.
- Watch for phishing scams, fake virus alert popup ads, and messages asking you to call a phone number or install software to unlock your computer.
- If you use WIFI at home, make sure your network is password-protected. Consider creating a second password-enabled WIFI network for visitors and guests.
- Do not shop or conduct financial transactions on public or unsecured WIFI networks. Use your cellphone as a hotspot, or bring a portable hotspot when you travel to create a more secure WIFI network.
- Treat your cellphone like a computer and keep all software and apps up-to-date.

Public Government Records

Court filings, voter registration, real property and tax assessor records, recorded liens and mortgages, driver's license records, motor vehicle records, telephone directories, real estate listings, birth records, marriage records, divorce records, death records, professional license filings, recreational (hunting and fishing) licenses, and census demographic information are all publicly available in various states.

THE MARSHAL'S OFFICE DOES NOT RECOMMEND OR ENDORSE ANY SPECIFIC PRODUCTS OR BRANDS – the information below is provided as examples of available products

Deleting a digital footprint can be challenging. Following the attack on U.S. District Court Judge Esther Salas' home that resulted in the death of her son and injuries to her husband, there have been more avenues to assist with monitoring and deleting information.

You can certainly do your own due diligence in removing your information online, however it is an ongoing process. I would encourage judges to find a service, such as one listed below, to do the work for them.

DeleteMe app

DeleteMe removes your personal information (like name, address, age, phone numbers, email address, and photos of your home) by removing it from the source. Removing personal information from data broker websites reduces your online footprint and keeps you and your family safe.
